

# STAINLESS STEEL UNIVERSAL PAN & BOTTLE RACKS

MODEL NO: PBRA

A modular system for storing bed pans, urine bottles, pan covers, & bowls or basins from 180mm to 355mm diameter with maximum depth of 102mm.

Standard units hold four, six or eight items.

Panels and drip trays are made of 0.9mm type 302 stainless steel for hygiene, strength, appearance and low maintenance.

One drip tray can serve any number of units of the same width placed above it.

The units have been sound dampened using a process that has eliminated problems of peeling plastic and rust.

The racks are easy to install and maximize use of available space in the pan room. A step by step illustrated assembly guide is supplied with each order.

**PAN RACK (WITHOUT DRIP TRAY)**
